

ConQuest Cases

Single Lid – Features

High Strength Aluminum Case Shell

- Made from 5052-H32 aircraft grade aluminum
- Will not blister, crack, bow, sag or creep
- Three performance grades to choose from: 0.060" Thick Aluminum
0.090" Thick Aluminum
0.125" Thick Aluminum

Riveted Construction /w Proprietary Formed Panel Joint System

- No edge extrusion to be torn off - a common fault with aluminum angle used on plywood cases
- Edges WON'T crack or split upon direct impact

Ultra High Strength Valance

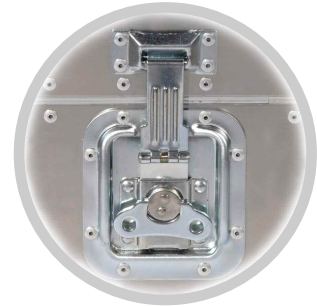

- Impact's proprietary square tubular extrusion offers unmatched resistance to deflection and shear forces
- Valance corners are reinforced with Impact's proprietary investment cast corner lugs (patent pending)

Single Lid – Features cont'd

Large Recessed, Valance Spanning Latches

- All latches are valance spanning to yield a high strength, continuous (uncut) valance

Large Recessed, Spring Loaded Handles

- High strength handles with rubber grips for comfort when lifting fully loaded cases

Large, Heavy-Duty Strut Hinges /w Integral Lid Stay

- No need for an internal lid stays which interfere with the case layout and contents

High Strength, Low Profile Triangular Corners
