Aluminum

The Right Choice For Any Application

For decades, Impact Cases has been manufacturing and customizing standard sized carrying and shipping cases for a variety of industries and government agencies. We have built our reputation on innovative designs, impeccable engineering and the strength of aluminum.

We shape aircraft grade aluminum to exacting tolerances and incorporate our proprietary strength / safety design features (Patent Pending) to create cases with unrivalled durability and functionality under any conditions.

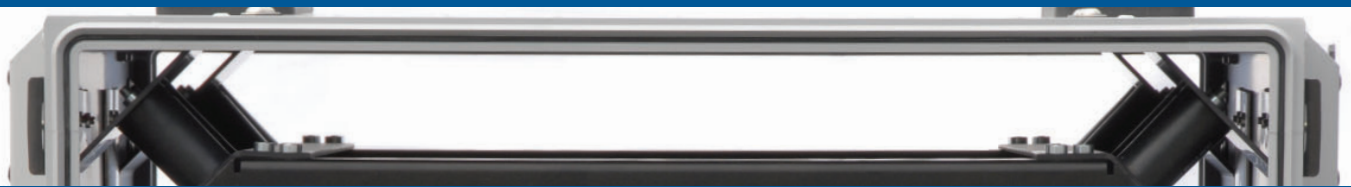

Aluminum's high strength to weight ratio, and its ability to perform consistently in extreme temperatures, make it far superior to either plastic or wood. Our cases won't warp, blister or rot like plywood laminate cases. They won't crack in the cold or sag in the heat like plastic cases.

Our Quick Ship single lid and shock-mounted 19" rackmount cases can be modified in a variety of ways both internally and externally, to better suit your application. Some modifications may increase delivery time. See our Custom Projects brochure or visit our website for more information.

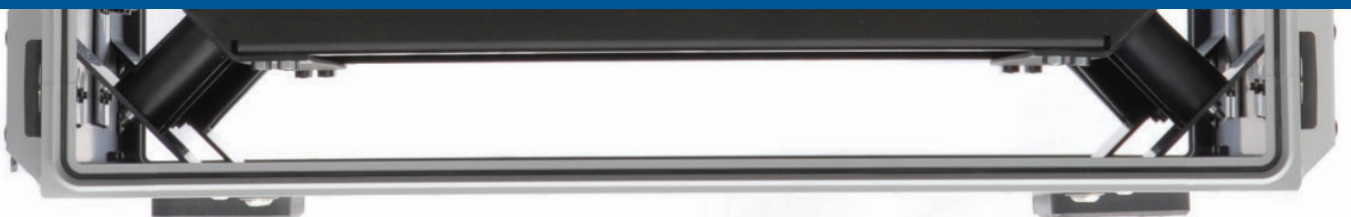

Impact Quick Ship Cases Whenever You Need Them

- Built Strong
- Sized Right
- Delivered Fast

Quick Ship Single Lid and Shock-Mounted STD 19" Rackmounts Are Ready To Go

- Our Quick Ship cases represent a select grouping of sizes and configurations.
- We can ship select sizes of our single lid, Quick Ship cases within 15 business days and select rackmount sizes within 20 business days.
- Our Quick Ship cases are never a compromise. You'll always get the superior strength and proprietary design features Impact Cases is famous for.
- See the enclosed size charts for a list of our Quick Ship single lid and rackmount sizes. Other sizes and modifications are available with a slightly longer lead time.

Rackmount

The world's
largest
selection of
shock-mounted,
STD 19"
rackmount
cases.

The durability of Impact's aluminum case designs will:

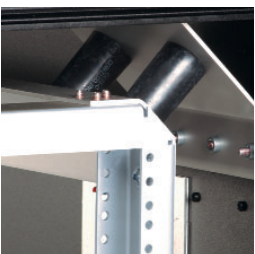

- maximize your investment
- increase payload capacity
- provide greater protection for sensitive equipment
- permit stacking for easier storage and greater functionality

No one else offers this combination of features:

- high strength aluminum rack frames
- elastomer shockmounts
- ultra high strength valance and corner lug system (Patent Pending)
- riveted construction with proprietary formed panel joint system
- all rackmount case shells are heavy payload ready

Modifications

These Quick Ship cases are designed to readily accept STD 19" electronics. End users typically require further modifications to ensure proper installation. Our Quick Ship rackmount cases are available with a variety of optional features to make them ready to accept your electronics. Other value added items improve component organization and expand functionality.

Single Lid

Engineered
for strength.
Sized for
convenience.

By combining the benefits of aluminum with exclusive strength and protective features, Impact has created a line of single lid cases that is unrivaled in the industry.

- Case shells made from 5052-H32 aircraft grade aluminum won't blister, crack, bow, sag or creep
- Riveted construction /w proprietary formed panel joint system prevents cracking or splitting on direct impact
- Ultra high strength valance features Impact's proprietary square tubular extrusion, which offers unmatched resistance to deflection and shear forces
- Valance corners are reinforced with Impact's proprietary investment cast corner lugs (Patent Pending)

Modifications

We offer a range of exterior modifications such as recessed latches, extra handles, wheels, and more. Plus, we place a great emphasis on case interior development including foam lining, blocks, layers and custom foam inserts. Impact Cases is one of the premier manufacturers of precision case and container interiors in North America.
